**SECTION 3: READING COMPREHENSION (10 marks)**

**Task:** Read the text below and answer the questions that follow it.

There are a lot of environmental problems nowadays, mainly because of pollution. It is the contamination of air, water and soil by different materials that litter. This affects human health and quality of life.

The emissions from industries and engines including cars are big causes of air pollutions and simple things that we do at home like aerosols have bad effects on the ozone layer which protects life on earth from ultraviolet radiation.

Water is also suffering from domestic pollution by domestic, municipal and also industrial waste. It is up to us to stop damaging the environment. "We all should be environment friendly."

Everybody should be involved in the well-being of our environment. People need to be responsible by ensuring that they don't litter and dump waste in the appropriate place.

**QUESTIONS**

1) Name two causes of environmental problems? (2mark)

.....  
.....
