SECTION C/ READING COMPREHENSION (10 MARKS)

Read following passage carefully and answer the questions that are based on it. Use correct English sentences and as far as possible, your own words.

The mobile money market is booming in Somalia. Approximately 155 million transactions, worth \$ 2.7 billion or 36 % of gross domestic product (GDP) are recorded every month. Mobile money accounts for a high proportion of money supply in the domestic, dollarized economy and has superseded the use of cash; seven out of 10 Somalis use mobile money services regularly. The mass adoption of mobile money raises concerns about the magnitude of the system's vulnerabilities, and potential macroeconomic effects in cases of disruptions – with potentially serious implications on the wider economy. As we explore in the latest Somalia Economic Update (SEU), customers have no guarantee that their e-money can be redeemed for cash, as there is no parity requirement between monetary value held virtually on the mobile money wallets and physical funds on deposit. Know-your-customer (KYC) data used to identify clients and determining the risks of illegal intentions is not systematically registered for mobile money wallets, and there are no formal frameworks to protect consumers in dispute cases. The lack of regulatory and supervisory oversight of mobile money services is a source of added concern. Mobile money experiences, especially those concerning the protection of consumer rights, have been stifled throughout the reporting period.

3

So how can Somali authorities protect consumers? The challenge for policymakers and regulators is how to introduce mobile money regulations on a market that has operated without regulatory oversight. Ensuring stability and reliability of the mobile money system is a priority, focusing on safeguards for consumer funds, improving compliance and risk management, reducing opportunities for fraud, strengthening regulatory reporting, and protecting consumer data. In the SEU, we recommend a phased-in approach for regulating mobile money services. The top priority must be to safeguard consumer funds and ensure continued and undisrupted service delivery. The second priority should be to strengthen service delivery via greater innovation, including stronger agent networks, internal controls, and holding providers responsible for agents. Once the protection of consumer funds and service delivery is guaranteed, it will be important to strengthen consumer protections, including data privacy, and create platforms for complaints and access to redress mechanisms. Regulation could then address the requirement for clear, consistent, and effective reporting and disclosures from providers. Mobile money services that are regulated and supervised provide opportunities for securely and responsibly expanding financial inclusion. This is amplified by the use of mobile money to transfer more than a billion dollars as remittances to Somalia. Regulation of mobile money is likely to promote greater financial stability and integrity, level the playing field, and boost the system's usefulness for more advanced applications. Balancing regulatory oversight with space for private sector innovation using the so called "regulatory sandbox", would allow regulation to keep up with innovation, and could increase the functional utility of mobile money.

- Somalia's mobile money services need to be adequately regulated before serving as a critical enabler for

innovation and anchor of financial sector development. A digitized identification system and social protection mechanisms are just two of many examples where innovation backed by financial technology can contribute to financial inclusion, equity and resilience.

QUESTIONS

1- What evidence is there to justify the fact that there is a mobile money boom in Somalia? (2 marks)

2- Give reasons why an increase in the adoption of mobile money as an economic mode of transaction among people in Somalia is a major cause for concern. (2marks)

3- What major problem do the Somali authorities find in trying to introduce mobile money regulations? (2marks)

4- According to the text, what four measures must the government implement in order to ensure the safe of mobile money transactions? (2marks)

5- Why, in your opinion, do most people prefer using mobile money in business transactions? (1 mark)

6- Suggest a possible title for this passage. (1mark)

SECTION D/COMPOSITION. (10 MARKS) Write an essay of between 200 and 250 words on any ONE of the topics below.

TOPIC 1: It has been observed that many students fail their exams because they misuse their mobile phones. Write an article to be published in The Gardian post. Your name is **Atangana Mboe**. In your article:

- Show 3 ways in which students misuse their phones
