## SECTION C

## COMPREHENSION

10 MARKS

Read the text and answer the questions which follow !

There are many different systems of government in the world. These include dictatorships, monarchies, emirates, federations, republics and democracies. Some countries combine the different systems to suit their own specific needs. Monarchies, emirates and sultanates are ruled by kings, queens, emirs or sultans. These leaders inherit their power to rule over a country. They are not elected by the people of the country.

In a dictatorship, a country is ruled by a one person or group of people who controlled everything. Dictators are also not elected. They take power through force. In a republic or a federation, the citizens elect representatives to make and enforce laws. Republics and federations are therefore democratic form of government. Most governments around the world today are based on democratic principles.

A democracy is a system of government in which all the people of a country can vote to elect their representatives. It is also defined as the government of the people, for the people, by the people. Democracy helps to ensure the fair and equal treatment of all citizens of a country and ensure their right to take part in making decisions. Free and fair elections are held on a regular basis to choose and replace governments. In democracy, the laws are applied equally to all citizens. No one, including the leaders should be above the law. The human rights of citizens are protected by the laws of the country.

In democracy, it is not only the government that operates on democratic principles. Schools and other organisations are also democratic. People are elected to serve on school governing bodies and councils on committees of organisation.
