SECTION C. READING COMPREHENSION (10 marks)

Read the following passage carefully and answer the questions that follow.

How to create an email address

To communicate via the internet, you need to have some kind of account and an email address. The people you communicate with should also have email addresses. With an email address, you can send and receive emails.

To create an email address, you have to enter some information about yourself on a website. Listen to these instructions carefully. Websites that offer email services include Yahoo, Outlook.com and Gmail. Open your computer and go to one of these websites.

Once you are on the website, click on 'Create an account'. Enter all the information requested. This should include your name, your age and perhaps your occupation. Next, you will need to create a username or ID and a password. A username is any combination of letters and numbers followed by the website you are using. An email address can be something like: christy03@yahoo.com, keric@outlook.com or pl20002frank@gmail.com. A password is a secret code that you create to protect your email so that other people cannot read it. A password ought to have at least six characters and it should not use family names and birthdays as other people may guess these.

• Lastly, you will need to read the terms and conditions and say that you agree with them. When the system confirms your username and password, you can log in and start communicating.

Examination Paper Correction

SECTION A: EVALUATION OF RESOURCE

You need to enter your name, age, and perhaps your occupation.
- 4. What is a username?**
A username is any combination of letters and numbers followed by the website you are using (e.g., christy03@yahoo.com).
- 5. What is a password, and what should it include?**
A password is a secret code that protects your email. It should have at least six characters and should not use family names or birthdays.

SECTION D: WRITING (10 marks)

Write a short paragraph (about 80-100 words) on the topic: "The Importance of Technology in Education."

Sample Answer:

Technology plays a crucial role in modern education. It makes learning more interactive and engaging through tools like computers, tablets, and online resources. Students can access a wealth of information on the internet, which helps them with research and projects. Additionally, technology allows for online classes, making education accessible to people in remote areas. Teachers can also use technology to create more effective lesson plans and track student progress. Overall, technology enhances the learning experience and prepares students for a tech-driven world.
