FORM 3

NAME OF STUDENT	DATE	SCORE	REMARK

GEOGRAPHY Time: 1hour30mins

SECTION A: MULTIPLE CHOICE QUESTIONS (15marks)

1. -------Refers to all of space and everything in it.
   A planet
   B) earth
   C) universe
   D) galaxy
2. What is a galaxy?
   A) A group of stars that occur together
   B) the sun and the planet
   C) the milky
   D) a group of stars, sun and moon in the sky.
3. The nearest large galaxy to milky way is ----
   A) Andromeda
   B) asteroids
   C) meteors
   D) meteorites
4. The original shape of the earth is called
   A) Geoid
   B) Orange
   C) Spherical
   D) Almost round and flat at the top.
5. The total surface area of the earth was estimated at
   A)40030Km
   B)12714 km
   C) 510064472 km2
   D) 47500424KM2
6. The planet commonly referred to as the dwarf planet is
   A) Pluto
   B) earth
   C) Jupiter
   D) Uranus
7. Which amongst the following planet takes the shortest duration or time to make a complete revolution?

sujetexa.com
http://sujetexa.com
Whatsapp : 677007035

(A) Earth

(B) Venus

(C) Mercury

(D) Neptune

8. Which of the following is not part of the solar system?

(A) Sun

(B) Planet

(C) latitudes

(D) Satellites

9. All of the following reasons explain why the earth is the only planet that supports life except?

(A) It has a strong gravitational force that pulls all objects to its Centre

(B) It has a suitable temperature

(C) It has a lot of carbon dioxide

(D) It has enough oxygen

10. What is the circumference of the earth at the equator?

(A) 40085km

(B) 39955km

(C) 12762km

(D) 12722

11. Why is the earth described as geoid? This is because the

(A) Earth has a perfect shape

(B) Earth is shapeless

(C) Earth is smaller at the poles and larger at the equator

(D) Earth rotates and revolves round the sun

12. The following are proofs that earth is spherical in shape. Which amongst them is the most up to date proof?

(A) Arial photographs

(B) Shape of other planets

(C) Sun rise and sun set

(D) lunar eclipse

13. The equator is to latitudes as .....is to longitudes?

(A) Prime meridian

(B) Great circles

(C) International Date Line

(D) Tropic of cancer

14. All of the following are uses of latitudes except?

(A) calculation of time

(B) location of places

(C) divide the world into climatic zones

(D) calculation of linear distance

15. Which of the following is not a characteristic of latitudes?

(A) they are measured east and west of prime meridian

(B) they are parallel

(C) they run from west to east

(D) their lengths reduce poleward

Section B: Essay type Question

Instructions: Answer ALL Questions from this section

1. a) State any TWO effects of the moon. (2 marks)

b) Draw the globe and represent the major lines of latitudes (5 marks)

c) Calculate the linear distance between the following latitude

ii) Artic circle and tropic of cancer, (2 marks)

d) i) State two uses of latitudes (2 marks)

ii) List four proofs to show that the earth is spherical in shape (2marks)

iii) Describe the real shape of the earth (2marks)
